

4 CLIP WATERTIGHT HATCH

MML Watertight Hatch Mild Steel

The watertight hatch is manufactured from 8mm thick cover plate, which is suitably stiffened with weld on ribs and fitted with a 40 x 25 EPDM section perimeter seal.

The hatch is secured by 4 clamping points linked together and can be operated from above by a stainless steel central hand wheel. The hatch is suitable for welding directly to the structure. The hatch is fitted with 2 off flush lifting points.

The hatch is shot blasted SA2.5 after fabrication and then primed one coat primer.

OPTIONS
